**To Whom It May Concern:**

**Subject: MS-4**

As a small borough within the Chesapeake Bay watershed project, we are concerned with the financial burdens being placed upon our residents by present and future mandates. Currently our budget lacks any surplus monies, and we are constantly delaying repairs and projects, in hope that monies will become available.

For the upcoming budget, our engineer has suggested that we set aside a line item that exceeds monies for most other items in the budget for this project. Our concerns are that we are going to be forced into a situation where most of our budget is directed toward this project.

We would like to know what mandates are currently required, what future implications and associated cost can be projected, and whether grants and funds will be available for assistance. Also, include what the penalties are for noncompliance.

We would appreciate any help, so that we may plan our future path with concerns for this project, and also project what effects that it may have on our community.
